

Swiss Youth Hostels

Offset your CO₂ emissions

Our commitment

In the course of our long-standing commitment to climate protection and sustainability in general, we have already achieved a great deal. Among other things, the Swiss Youth Hostels are realising their buildings in accordance with the Minergie Eco standard and utilising alternative sources of energy. Together with strong energy partners, we strive continuously for the sustainable development of the Swiss Youth Hostels. One part of the Swiss Youth Hostels sustainability strategy concerns offsetting the remaining emissions. By fine-tuning the various measures, we have been able to reduce the offset contribution from CHF 0.50 to CHF 0.30 per overnight stay – also thanks to your commitment.

Your support

Working in collaboration with the «myclimate» foundation, the Swiss Youth Hostels are supporting projects to offset CO₂ emissions. By choosing to stay at one of the Swiss Youth Hostels, you have already made a very good ecological choice. **With a contribution of just CHF 0.30, you can make your overnight stay carbon-neutral.**
