This guest directory aims to inform you about all our services and to make your stay with us as pleasant as possible.

If you need any further information please contact the reception staff. We appreciate the trust you place in us and we wish you a pleasant stay.

The Management

## THE HISTORY OF THE ABBEY

The foundation of the Abbey of Hyverneaux is a subject of historical controversy:

According to records from the 18th century it was founded by Saint Louis, King of France in execution of the will of his father, Louis VIII and through the sale of crown jewels.

However, if the Abbey received a royal charter at that time, its initial foundation is slightly earlier (around the year 1200).

The original buildings were impressive:

A Latin cross church (with transept) measured 26 fathoms long (about 57 yds) and 9 fathoms high, Arches decorated with crosses, windows decorated with rosettes and stained glass, side chapels on the south side, high bell tower, cloisters, vaulted refectory were the buildings completing the ensemble. It presented all the characteristics of those days, or the Gothic style of the early 13th century with intersecting ribs, hooked arches and an imposing entrance gate.

After various periods and changes of fortune, in the 17th century Hyverneaux was half in ruins and almost deserted. It was renovated by Alexandre Bontemps, the first valet of Louis XIV (a position of immense importance) who carried out significant works: half demolishing and consolidating the buildings. He also restored the monastic order.

In 1784, again deserted and in ruins, the Abbey was suppressed by the Committee in charge of reviewing the situation of so many communities in distress.

The revolution ended with the sale as state property and the transformation into a farm.

The wooden altarpiece, the stalls of the monks and one of the bells were transported to the parish church in Lésigny and are still there.

The demolition of the religious areas left only three Gothic arches built into the main building, which was the entrance to the chapter room.

The 1988 works revealed preserved foundations, two bases of the pillars of the crossing, numerous broken fragments and a few carved stones almost intact the pedestals of the columns of the cloister and a historic portal statue of a beheaded biblical king.

This statue has been classified as a historical monument in 1995 (visible on site).

Some portions of land, not affected by the works, still contain the remains intact underground.

The transformation into a Hotel and Restaurant has left only the outside walls:

- the entrance of the hotel was the chapter room,
- the bar, kitchen and terraces occupy the site of the church,
- the rooms were dormitory's and abbots home,
- the court is the former cloister,
- the seminar rooms were the kitchen and cellars.

- Dinner: 7:00 p.m. to 10:30 p.m. (last orders at 9:30 p.m.) Monday to Thursday

Our chef offers seasonal starters, main courses and desserts

## HELP US PROTECT THE ENVIRONMENT!

Can you imagine how many towels are unnecessarily washed every day all over the world and what huge quantities of washing powder therefore also pollute our water?

With your decision to use the towels once again, you are contributing to a cleaner and better environment.

- Towels on the floor or in the bath: « Please change the towels ».
- Towels on the rack mean: « I am still using them ».

### TO PROTECT THE NATURE:

We will change your sheets on request or every three nights.

If you want us to change your sheets more often please inform the Reception.

To reduce rubbish, we have available free of charge at the reception:

- Tissues
- Cotton buds
- Shaving kit
- Toothbrush and toothpaste
- Sewing kit
- Hotel slippers
- Combs
- Courtesy tray
- Shoe care kits

## WATER

Water is a rare commodity, permanently threatened by agricultural, industrial or domestic pollution. The population has tripled over the last century and water consumption has increased six-fold. The water shortage in the world is a major challenge for coming years.

In France, only 1% of drinking water is drunk.

In Lesigny, we do all we can to preserve the quality of water without sacrificing our guests' comfort.

- Our taps and shower heads are equipped with foamer-aerators, reducing water consumption by up to 30% without altering the quality of flow.
- Our personnel are trained in water saving to avoid wastage during cleaning operations.

At the hotel and at home, let's help save water.

### **IN THE BATHROOM AND TOILETS :**

Make sure taps are switched off.

Don't leave water running unnecessarily.

Call the staff if you find any leaks.

Be careful of what you throw into the toilets: organic material, cigarette ends, sanitary towels... are sources of pollution and reduce the quality of operations at purification plants. Waste bins are available in the bathroom.

### **LINEN AND TOWELS:**

To match your consumption of bed linen and towels to your needs, please put bathroom linen to be replaced by the chamber maid in the morning, on the floor or in the bath.

## WASTE

Over the past 20 years, the quantity of waste has almost tripled, leading to pollution and waste.

At the hotel we have decided to take action at source, by limiting packaging:

In the bathrooms we have installed large format shampoo and shower gel distributors rather than the single use formats.

We also implement selective waste sorting.

Apply these simple rules to help us recover and reduce the volume of waste :

To facilitate sorting, leave glass to one side (on the desk) and newspapers (on the bedside table).

A basket is provided for used batteries.

You will find a yellow bin outside the hotel to recycle your waste:

- Metal, steel and/or aluminum packaging and waste: cans, cans, aerosols, coffee pods, compote gourds, etc.;
- Cardboard packaging and food bricks: milk cartons, fruit juice cartons, boxes of cakes, cereals or the cardboard surrounding your yoghurts;
- All papers: newspapers, magazines, advertisements, books, envelopes...;
- Plastic packaging and waste: water bottles, detergent cans, frozen food bags, plastic bags, plastic bottles, etc.

## ENERGY

The energy used today is obtained from non-renewable sources, available in limited quantities (coal, oil, gas, ...).

In France, housing and transport, with increasing CO<sub>2</sub> emissions every year, are responsible for half the total emissions of greenhouse gases, ahead of industry and agriculture.

In our hotel, we consider that the quality of our services also includes protecting the environment and we constantly work to reduce our energy consumption.

Timers have been installed in the corridors to avoid wasting electricity.

Our team is trained in energy saving to avoid wastage.

### **IN THE ROOMS:**

Please remember to close the window(s) when the heating is on.  
Don't forget to switch off the lights when you leave your room.

## TRANSPORTS

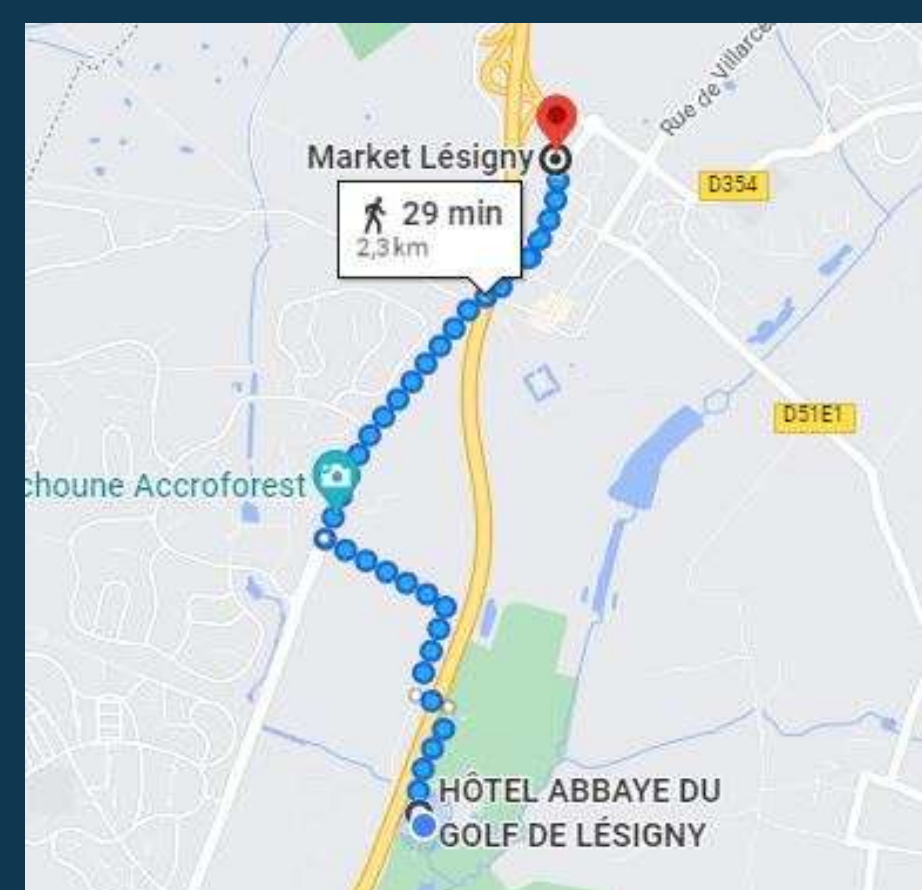

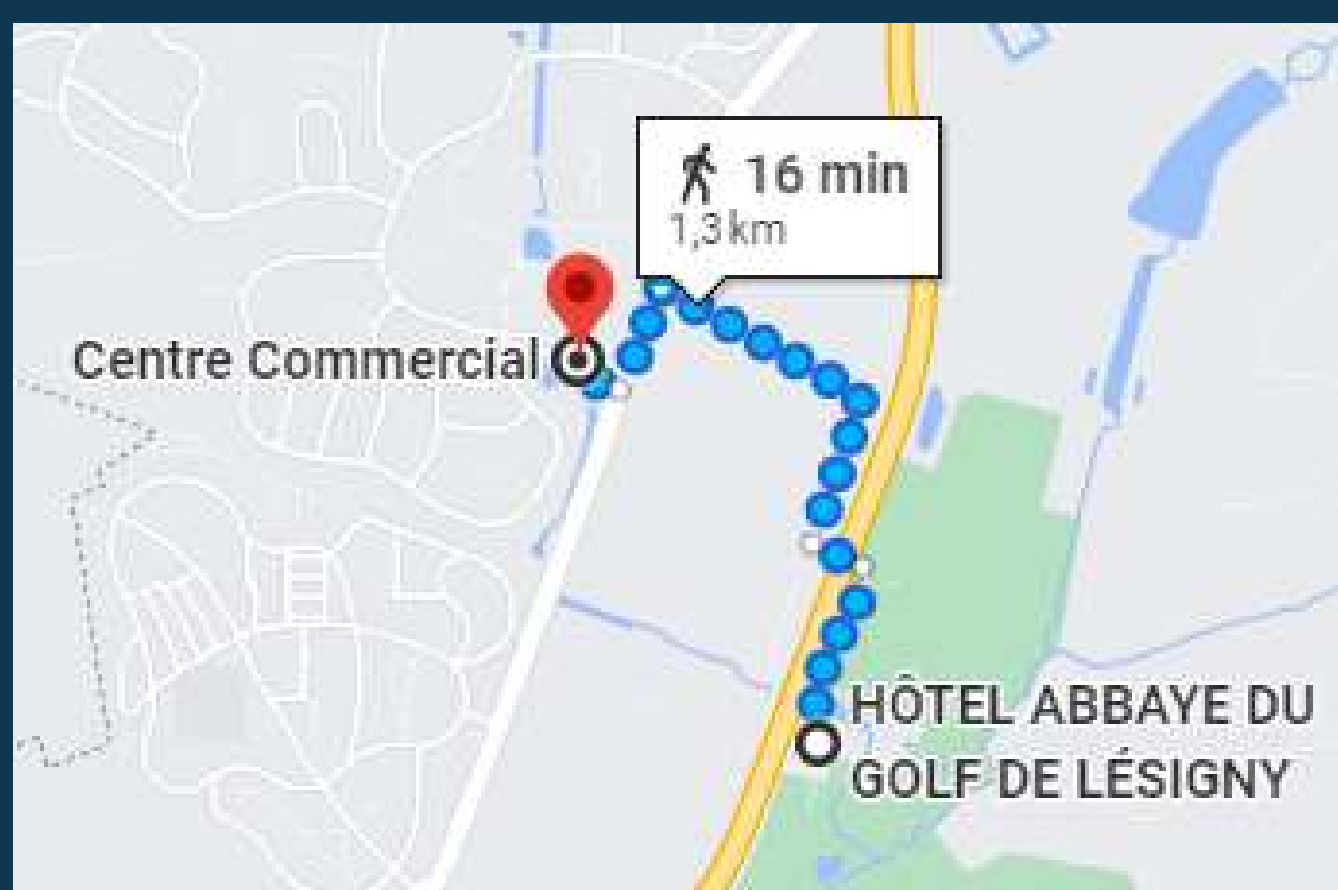

BUS

To reduce your carbon footprint why not make use of public transport ?  
Bus N° 14 from the Commercial Centre of Lésigny to Ozoir La Ferrière Train Station (RER E)  
Bus N° 10 from the Commercial Centre of Lésigny to Noisiel Train Station (RER A)

Lésigny also offers a car share service, which is situated on the car park of the Carrefour Market Supermarket. This gives easy access to the N104 Motorway and a nearby bus stop.

To further protect the environment, your bed sheets will be changed after your 3rd night. If you prefer they are not changed please inform the reception.

**HÔTEL ABBAYE DU GOLF**  
de Lésigny

The entire team of the Abbaye du Golf Hotel remains at your service for any other request during your stay.

We hope that your stay will take place in the best conditions and will be delighted to receive your appreciation.
